

<p>Plasma based air cleaning system is sustainable, low cost, low waste solution for odour removal</p>	<h3>Description </h3> <hr/> <p>Gechem is a company for development and implementation of environmental solutions. We are searching a simple and effective solutions to make earth a better place to live.</p>
 <p>GEOCHEM d.o.o. Slovenia</p>	<h3>Business Model </h3> <hr/> <p>Odour problems are very often in different places: sewerage system, waste water treatment plants, waste landfill, industry and traffic. The requirements for cleaner environment and odour free are high. There are many solutions for different type of odour, but they are often expensive and they produce a lot of waste (waste carbon for example). A technology removing odour using only electricity is and elegant method, that can improve odour removal and lower cost of air cleaning. Suggested technological solution of removing odour in the air with cold plasma</p>
