

The Internet of Cargo, where Cargo can tell their needs to the Logistic processes, Vehicles and Storage Facilities

Description

Sensefinity allows the Cargo to talk to the processes by providing a globally cloud connected sensor which is capable of monitoring the cargo condition and alert on uncompliant conditions.

Sensefinity
Portugal

Business Model

We sell our Sensor as a Service. The monthly fee includes global communications, hardware, cloud and API for logistics and intra-logistics.

Category

Air, water & environment; Monitoring & compliance; Circular economy / waste mgmt.; Mobility, transport & logistics; Smart (e)mobility; Aviation; Ships; Other Vehicles; Food and beverage; Clean Industry; Monitoring and Compliance
