

Onwrks develops software to predict maintenance and optimize wind turbines

## Description

Onwrks' software analyses data that every wind turbine operator receives from its turbines, and returns accurate predictions for future failures and configuration optimization suggestions. Onwrks' solution is purely software and is easy to scale over entire wind parks, returning results in real time.

Onwrks  
Germany (Berlin)

## Business Model

Onwrks takes a percentage of its customers savings

## Category

Clean Energy; Wind; Clean Industry; Industry efficiency; Industrial Automation; Monitoring and Compliance; Online/digital services/eCommerce; Data Centres and Services

## Target

By end of 2018 Onwrks will have a first Utility client with over 500 MW of wind turbines in its portfolio.
