

<p>A healthy agriculture is the man's most valuable asset.</p>	<h3>Description </h3> <hr/> <p>QWERTY SMART IDEAS SRL-D is developing a sustainable and non-intrusive for the nature agriculture by using traditional ways for working and treating the land. Bio products, which are healthy and tasty are developed by our Start-up. We also promote education for a healthy way of living by promoting the consumption of healthy products and involving children and young people in traditional agricultural activities.</p>
<p>QWERTY SMART IDEAS</p>	<h3>Business Model </h3> <hr/> <p>We have identified 2 types of problems of industrial agriculture: agriculture process and agriculture products. The problems with agriculture process are: pollution generated by chemical products and by machines involved, lower involvement of people. In case of agriculture products, problems are: High level of waste generated by the supra-production and not tasty and unhealthy products. Overall, lack of consuming education within the buyers. The solutions that we propose are: a sustainable agriculture, bio products and education for a sustainable living</p>
<h3>Category</h3> <hr/> <p>Agriculture</p>	<h3>Target </h3> <hr/> <p>For 2017, our goals are: 1. Identify and prepare the land for agriculture activity. A land on which we cultivate vegetables and a land on which we plant fruit trees. 2. Analyze of the specific needs for our clients. For this, we are targeting the contracting of a company to carry out the a field research among children from grade 1-4, parents and young people working in multinational companies. 3. Image of our company: website, logo, motto, Facebook page and posters, leaflets. 4. To promote the business within the potential clients.</p>
