

<p>Minimize the BOD measurement time from 5 days to 5 minutes by our innovative monitoring system!</p>	<h3>Description</h3>  <p>ENOVA H2O is a company which develop innovative instruments and smart solutions for sustainable water management and monitoring. Our mission is to convert the border between the research and industry into a bridge for knowledge and technology transfer. The BOD monitoring system we designed is based on new generation of biosensors capable to detect and quantify the organic pollutants in water.</p>
 <p>ENOVA H2O Bulgaria</p>	<h3>Business Model</h3>  <p>In 2019, ENOVA H2O will introduce two products to the market - Industrial Monitoring Stations (Subscription based service, oriented to specific customers like WWTPs) and Portable BOD meters (One-time fee sales product). KEY FEATURES INCLUDE: Minimizing analysis time; Real time monitoring; Reagents free measurement; In situ application (no sample collection and transportation); Micro volume samples; GPS and Time/Date tags for each value measured; Easy integration to GIS and SCADA environments; Possible integration with different IoT solutions for remote</p>
<h3>Category</h3> <p>Air; Water; Monitoring & compliance; Monitoring and Compliance; Biotech</p>	<h3>Target</h3>  <p>In 2019 we are aiming to: 1) BUILD SALES CHANNELS AND SUPPLY CHAINS; 2) INCREASE PRODUCTION FACILITIES CAPACITY; 3)ATTRACT STRATEGIC PARTNERS OR INVESTORS.</p>
