

F-gases are causing Global Warming, with FREON FROG  
F-gases are causing Global COOLING

## Description

Freon Frog box enable existing cold storage systems to work in accordance with „New EU F-gases regulation" without huge investment in disassembling and installing new equipment. Freon Frog is absolute control of f-gases, with reuse and recycle of f-gases without human touch. Freon Frog doesn't stop just f-gases from leaking but also your money. It gives you cooling and heat energy, demineralized water and reduce electrical bills to 45%.

Freon Frog  
Serbia

## Business Model

„New EU F-gases regulation" active from 2020 is addressing that all F-gases users as cold storage in food industry, pharmacy, hospitals, transport, computer centres, because of sudden leaking of f-gases, have to change systems. This mean investments in money and time. Freon Frog stops f-gases from leaking and your money and time. Freon Frog is reason why existing equipment in cold storage can work in according to regulation.

## Category

Waste to energy; Sensors and actors; Food and beverage; Industry efficiency; Monitoring and Compliance

## Target

Our target is to achieve or first reconstruction and installation of Freon Frog box. To present our solution to big European Agricultural Congress.
