

We bring smart solutions to smart cities!

Description

Inteligg is a startup company with the mission to deliver intelligent, innovative and sustainable solutions for Smart Cities and Communities. Inteligg develops products, provides services and engages in research in the fields of energy, transport, environment and rural applications.

Inteligg P.C.
RIS-CountriesGreece

Business Model

Buildings consume between 35%-40% of total energy in EU countries with 35% to 70% of this amount used for indoor heating and cooling, far from European directives for buildings energy performance. Thus EU encourages the use ICT and smart technologies to ensure buildings operate efficiently and there is our solution, a self-learning and self-adjusting smart thermostat providing energy efficient solutions on buildings based on advanced Artificial Intelligence and Model Predictive Control algorithms saving up to 40% energy on a B2B2C model.

Category

Management of networks, grids; Air; Monitoring & compliance; Smart building; Sensors and actors; Traffic Management; Smart (e)mobility; Cars; Bikes; Other Vehicles; Industrial Automation; Analytics; Artificial intelligence; Medical technology/devices

Target

Our goals for 2020 are to a) Finish ergonomic design of final to be launched product (device/s), b) Receive EU patent (process initiated), c) Obtain the CE mark, d) Sign first B2B contracts in home country and EU and e) Attract Investors for further strategic partnership and scale-up of the company
