

<p>Experts in IoT (Internet of things) with a unique combination for Hardware Design and an in-house biological laboratory.</p>	<h3><u>Description</u></h3>  <p>EMBIO Diagnostics (EMBIO) designs and develops custom based hardware solutions and consults as an expert in the biotechnology at a global scale.</p>
 <p>Embiodiagnostics Detect Everywhere</p> <p>EMBIO Diagnostics Cyprus</p>	<h3><u>Business Model</u></h3>  <p>We have developed a state of the art hardware the read biosensor signals and detect specific substances</p>
<h3><u>Category</u></h3> <p>Air, water &amp; environment; Monitoring &amp; compliance; Food and beverage; Urban micro farming equipment; Agriculture; Biotech</p>	<h3><u>Target</u></h3>  <p>Rapid Biosensors produce screening results in 3 minutes. The system can be adopted to detect anything. By modifying the biosensors the device can be adjusted to measure any signal from the electrode. The mobile application uses algorithm to calculate response. The system provides support and blockchain integration for securing the information.</p>
